INVESTMENT STRATEGY

Vericimetry US Small Cap Value Fund is a no-load mutual fund seeking to provide a specific asset class risk-reward exposure combined with long-term capital appreciation. The Fund invests in a wide and diverse universe of marketable US small-value stocks using a market cap weighted approach. The Fund's managers employ a pre-determined "Enhanced Index" investing strategy designed to outperform the Russell 2000 Value benchmark over long-term time horizon.

The Fund's small-cap universe is comprised of US securities with a market cap that is often less than 10% of the total market capitalization. The Fund's value universe is comprised of US securities with multiple well-established value factors such as high book-to-market, low price-to-earnings, low price-to-operating cash flow, and low price-to-sales.

The Fund is currently available through an exclusive group of registered investment advisers who seek to benefit from the small and value risk premiums on behalf of their buy-and-hold clients.

ABOUT VERICIMETRY

PRINCIPAL RISKS OF INVESTING

Investors should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus which contains this and other important information about the Fund visit our website at www.vericimetryfunds.com or call 1-855-755-7550. Please read the prospectus carefully before investing.

Economic, political, and issuer specific events will cause the value of securities to rise or fall. Because the value of your investment in the Fund will fluctuate, there is the risk that you will lose money. Securities of small and microcap companies are often less liquid, more volatile and they may have more limited resources. Value stocks may perform differently from the market as a whole and may underperform equity funds that use other investment strategies. The investment strategies, practices and risk analysis used by the Adviser may not produce the desired results.

DISTRIBUTOR
